List of Figures v
List of Tables viii
List of Abbreviations ix

1 Introduction **1**
1.1 Motivation 1
1.2 Goals and Organization of this Work 2

2 Global Navigation Satellite Systems **5**
2.1 Principle of Satellite Navigation 5
2.1.1 Positioning using GNSS Space Vehicles 5
2.1.2 Reference Coordinate Systems 8
2.1.3 Satellite Orbit and Propagation Error Correction Parameters . . . 9
2.2 NAVSTAR GPS 13
2.2.1 NAVSTAR GPS System Segments 14
2.2.2 Signal-in-Space Generation and Characteristics 15
2.3 Galileo 20
2.3.1 Galileo System Segments 21
2.3.2 Signal in Space Characteristics 21

3 State-of-the-Art GNSS Receiver Architectures **27**
3.1 Acquisition and Tracking Receiver Architecture 27
3.2 Single-Shot Receiver Architecture 30

3.3 Search Space versus Time-to-First-Fix 34

4 Long-Range Time Synchronization 35

4.1 DCF77 Signal-in-Space Characteristics 36

4.2 Time Synchronization via LW Radio Signals 38

5 DAGNSS Receiver Architecture 43

5.1 System Overview 44

5.2 Analog-Radio-Frequency (RF) Frontend Architectures 45

5.2.1 GNSS RF Frontend 45

5.2.2 DCF77 RF Frontend 46

5.3 Digital Baseband Signal Processing Architecture 48

5.3.1 Input Signal Memory 49

5.3.2 Local PRN Memory 51

5.3.3 Correlation Engine 54

5.3.4 Baseband Control 58

5.4 Host Hardware and Operating System 58

5.5 Positioning Software 59

6 Systemsimulation 71

6.1 Simulation Setup 71

6.1.1 DCF77 SIS Model 72

6.1.2 GNSS SIS Model 75

6.1.3 DCF77 RF Frontend Model 78

6.1.4 GNSS RF Frontend Model 82

6.1.5 Digital Baseband Signal Processing Model 83

6.1.6 Positioning Solution 83

6.2 Simulation Results 84

6.2.1 DCF77 Simulation Results 84

6.2.2 GNSS Simulation Results 87

7 Summary and Outlook 101
