

# Contents

<b>1</b>	<b>Introduction</b>	1
1.1	Motivation	1
1.1.1	Robust analysis	1
1.1.2	Robust control	3
1.2	Aim and main goals of the thesis	4
1.3	Outline and contributions	5
<b>2</b>	<b>Stability analysis with integral quadratic constraints</b>	9
2.1	Introduction	9
2.2	A specific feedback interconnection	10
2.3	Stability analysis with integral quadratic constraints	12
2.4	Robust stability and performance analysis	13
2.4.1	Robust stability analysis	13
2.4.2	Robust performance analysis	14
2.4.3	Mixed uncertainties	16
2.5	From infinite to finite dimensional feasibility tests	17
2.5.1	Parameterizing IQCs	17
2.5.2	The KYP Lemma	20
2.6	IQC-multipliers for uncertainties and nonlinearities	21
2.6.1	Uncertain LTI dynamics	21
2.6.2	Arbitrarily fast time-varying parametric uncertainties	25
2.6.3	Time-invariant parametric uncertainties	30
2.6.4	Rate-bounded time-varying parametric uncertainties	34
2.6.5	Time-delay uncertainties	37
2.6.6	Passive uncertainties/nonlinearities	40
2.6.7	Norm-bounded uncertainties/nonlinearities	41
2.6.8	Sector bounded and slope-restricted nonlinearities	42

2.6.9	Popov multipliers . . . . .	49
2.7	IQC-multipliers for performance . . . . .	51
2.7.1	Induced $\mathcal{L}_2$ -gain performance . . . . .	51
2.7.2	Passivity performance . . . . .	52
2.7.3	Quadratic performance . . . . .	53
2.7.4	$\mathcal{H}_2$ -performance . . . . .	54
2.7.5	Dynamic generalized quadratic-performance . . . . .	56
2.8	Further connections and possibilities . . . . .	60
2.8.1	Connection to the $\mu$ -theory . . . . .	60
2.8.2	Alternative computational methods . . . . .	63
2.8.3	Discrete-time systems . . . . .	63
2.8.4	Further possibilities . . . . .	64
2.9	Illustrations . . . . .	64
2.9.1	Robustness analysis of an estimator . . . . .	65
2.9.2	Robustness analysis of a helicopter . . . . .	72
2.10	An alternative proof of the IQC-theorem . . . . .	76
2.10.1	Preparations . . . . .	77
2.10.2	Key difficulties to resolve . . . . .	79
2.10.3	A novel reformulation of the IQC-theorem . . . . .	80
2.10.4	The proof . . . . .	84
2.10.5	Outline and possibilities . . . . .	90
2.11	Chapter summary . . . . .	90
<b>3</b>	<b>From analysis to synthesis . . . . .</b>	<b>93</b>
3.1	Introduction . . . . .	93
3.2	Robust controller synthesis . . . . .	94
3.3	Gain-scheduled controller synthesis . . . . .	96
3.4	Robust gain-scheduled controller synthesis . . . . .	100
3.5	Preparations . . . . .	102
3.6	Nominal controller synthesis . . . . .	104
3.7	Nominal gain-scheduled controller synthesis . . . . .	107
3.8	Outline of further possible configurations . . . . .	110
3.8.1	Robust gain-scheduled estimation . . . . .	110
3.8.2	Another general synthesis framework . . . . .	111
3.8.3	General IQC-synthesis . . . . .	111
3.9	Chapter summary . . . . .	112
<b>4</b>	<b>Robust gain-scheduled estimation . . . . .</b>	<b>113</b>
4.1	Introduction . . . . .	113
4.2	The robust gain-scheduled estimation problem . . . . .	115
4.3	Robust stability and performance analysis . . . . .	116
4.4	From analysis to synthesis . . . . .	119

4.4.1	A characterization of nominal stability . . . . .	120
4.4.2	Reformulation of the analysis LMIs . . . . .	122
4.5	A convex solution . . . . .	127
4.6	Illustrations . . . . .	137
4.7	Chapter summary . . . . .	140
<b>5</b>	<b>Another general synthesis framework . . . . .</b>	<b>141</b>
5.1	Introduction . . . . .	141
5.2	A generic feasibility problem . . . . .	144
5.3	A convex solution . . . . .	147
5.3.1	Analysis . . . . .	147
5.3.2	Synthesis . . . . .	152
5.4	Robust gain-scheduling control for systems without control-channel uncertainties . . . . .	157
5.5	Concrete applications . . . . .	165
5.5.1	Generalized $\mathcal{L}_2$ -synthesis . . . . .	165
5.5.2	Multi-objective and structured controller synthesis . . . . .	167
5.5.3	Robust gain-scheduled observer design . . . . .	167
5.5.4	Open-loop controller synthesis . . . . .	169
5.5.5	Synthesis with uncertain performance weights . . . . .	170
5.5.6	IQC-synthesis with unstable weights . . . . .	171
5.6	Illustrations . . . . .	174
5.6.1	Open-loop controller synthesis . . . . .	174
5.6.2	Robust observer design . . . . .	175
5.7	Summary . . . . .	178
<b>6</b>	<b>IQC-synthesis with warm-start options . . . . .</b>	<b>179</b>
6.1	Introduction . . . . .	179
6.2	Problem formulation . . . . .	180
6.3	Nominal controller synthesis and robust analysis . . . . .	182
6.3.1	Nominal controller synthesis . . . . .	182
6.3.2	Robust stability and performance analysis . . . . .	183
6.4	From analysis to synthesis . . . . .	184
6.5	On the factorization of IQC-multipliers . . . . .	186
6.6	Warm-start techniques for robust controller synthesis . . . . .	189
6.6.1	Constructing initial conditions for the synthesis step . . . . .	189
6.6.2	Constructing initial conditions for the analysis step . . . . .	194
6.7	IQC-synthesis with warm-start options . . . . .	196
6.8	Illustrations . . . . .	197
6.8.1	A mixed sensitivity design problem with parametric and delay uncertainties . . . . .	197
6.8.2	A distillation process with a control channel nonlinearity . . . . .	201

6.9	Summary .....	202
<b>7</b>	<b>Conclusions and recommendations .....</b>	<b>205</b>
7.1	Conclusions .....	205
7.2	Recommendations for future research .....	206
	<b>Appendices .....</b>	<b>209</b>
<b>A</b>	<b>Explanation of symbols .....</b>	<b>211</b>
