<b>Introduction</b>	<b>11</b>
<b>1 Cluster-Expansion Technique I: Up to the Boltzmann Limit</b>	<b>15</b>
1.1 Introduction . . . . .	15
1.2 Formal Aspects . . . . .	16
1.3 Coulomb Interaction in a Single Band . . . . .	18
1.4 General Two-Particle Interactions . . . . .	21
1.4.1 Coulomb Interaction . . . . .	24
1.4.2 Spin Interaction . . . . .	25
1.5 General Electron-Boson Interactions . . . . .	26
1.5.1 Electron-Phonon Interaction . . . . .	27
1.5.2 Light-Matter Coupling . . . . .	28
<b>2 Electron Spin Dynamics in GaAs under Elevated Excitation Conditions</b>	<b>31</b>
2.1 Introduction . . . . .	31
2.2 Theoretical Approach . . . . .	32
2.3 Experiment . . . . .	35
2.4 Results . . . . .	37
2.5 Conclusions . . . . .	40
<b>3 Electron Spin Dynamics due to the Bir-Aronov-Pikus Exchange Interaction</b>	<b>43</b>
3.1 Introduction . . . . .	43
3.2 Hamiltonian and Dynamical Equations . . . . .	44
3.3 Relation to Relaxation Times . . . . .	46
3.3.1 BAP Treatment . . . . .	47
3.3.2 Numerical Results for Spin-Relaxation Times . . . . .	49
3.4 Numerical Results for Microscopic Electron Dynamics . . . . .	52
3.5 Summary . . . . .	55
3.6 Appendix I: Exchange Matrix Elements . . . . .	55
3.7 Appendix II: Numerical Evaluation of BAP Spin-Relaxation Time . . . . .	57
3.8 Appendix III: Numerical Evaluation of Electron-Hole Scattering Integrals . . . . .	58
3.9 Appendix IV: Inclusion of Screening Effects . . . . .	59
<b>4 Spin-Dependent Hole Dynamics in Bulk GaAs</b>	<b>61</b>
4.1 Introduction . . . . .	61
4.2 Set-Up of Dynamical Equations . . . . .	62
4.2.1 Electronic band structure . . . . .	62
4.2.2 Role of Coherent Hole-Spin Precession . . . . .	63
4.2.3 Dynamical Equations . . . . .	64
4.2.4 Different “Polarizations” . . . . .	65
4.3 Experimental Results . . . . .	65

4.4	Numerical Results . . . . .	67
4.4.1	Carrier Excitation and Dynamics . . . . .	67
4.4.2	Dependence on Excited Carrier Density and Temperature . . . . .	70
4.4.3	Influence of p-Doping . . . . .	71
4.5	Results Including All Bands . . . . .	73
4.6	Conclusions . . . . .	74
4.7	Appendix I: Hamiltonian . . . . .	74
4.8	Appendix II: Numerical Treatment . . . . .	76
<b>5</b>	<b>Ultrafast Demagnetization in Ferromagnetic Transition Metals</b>	<b>79</b>
5.1	Introduction . . . . .	79
5.2	Theoretical Approach . . . . .	80
5.3	Clarification of Different Bath Approximations . . . . .	82
5.4	Experimental Setup . . . . .	83
5.5	Numerical Results . . . . .	83
5.6	Conclusions and Outlook . . . . .	87
<b>6</b>	<b>Cluster-Expansion Technique II: Quantum Kinetics</b>	<b>89</b>
6.1	High Order Coulomb Interaction . . . . .	89
6.2	Results on Dissipationless Coulomb Scattering . . . . .	91
6.3	Higher Order Electron-Boson Interaction . . . . .	94
<b>7</b>	<b>Spin Dynamics in the 1D Kondo-Lattice: Mean Field and Doublet Level Results</b>	<b>97</b>
7.1	Introduction . . . . .	97
7.2	Realizations of the Model . . . . .	98
7.2.1	GaMnAs and Related Materials . . . . .	99
7.2.2	Gadolinium . . . . .	99
7.3	Application of the Cluster Expansion . . . . .	100
7.4	Mean Field Calculations . . . . .	102
7.4.1	One-Dimensional Model System . . . . .	103
7.4.2	Curie Temperature of GaMnAs . . . . .	106
7.5	Results at the Doublet Level . . . . .	107
<b>8</b>	<b>1D Kondo-Lattice Model: Correlation Dynamics at Triplet-Scattering Level</b>	<b>113</b>
8.1	Observation of Long-Range Order . . . . .	113
8.2	Comparison with Bose-Einstein Condensation . . . . .	116
8.3	Relation to Superconductivity and Influence of Magnetic Fields . . . . .	117
8.4	Phase Diagram . . . . .	121
8.5	Outlook: Experiments and Theoretical Extension . . . . .	121
<b>Bibliography</b>		<b>125</b>
<b>List of Journal Publications</b>		<b>131</b>
