# Contents

**Abstract** **xix**

**1. Introduction** **1**

**2. Calculation Methods and Descriptive Analysis** **7**
2.1. Introductory Remarks . . . 7
2.2. Bootstrapping . . . 8
2.3. Nelson–Siegel Model and its Extensions . . . 11
2.3.1. Nelson-Siegel Model . . . 11
2.3.2. Extension: Svensson . . . 11
2.3.3. Extension: Diebold and Li . . . 12
2.4. Principal Component Analysis . . . 13
2.5. Data . . . 16
2.6. Dynamic of Spot Rates in Levels . . . 17
2.7. Stationarity . . . 19
2.8. Normality Tests . . . 25
2.9. Calculation of Principal Components . . . 28
2.10. Short Summary . . . 34

**3. Estimation Models** **35**
3.1. Introductory Remarks . . . 35
3.2. Basics about ARCH/GARCH Processes . . . 36
3.3. Mixture GARCH(1,1) Models . . . 38
3.3.1. General Remarks . . . 38
3.3.2. Moments and Stationarity Conditions . . . 42
3.3.3. Normal Mixture GARCH(1,1) . . . 48
3.3.4. $t$-Mixture GARCH(1,1) . . . 50
3.3.5. Exponential Power Mixture GARCH(1,1) . . . 55
3.4. Skewed Exponential Power GARCH(1,1) . . . 59
3.5. Gauss–Laplace Sum GARCH(1,1) . . . 62
3.6. Skewed Gauss–Laplace Sum GARCH(1,1) . . . 65
3.7. Markov Switching GARCH(1,1) . . . 68
3.7.1. Basic Principles . . . 68
3.7.2. Relation to GARCH(1,1) . . . 73
3.7.3. Two Extensions . . . 77

3.8. Concluding Remarks . . . 77

**4. Estimation Results** **79**
4.1. Introductory Remarks . . . 79
4.2. Pre–Estimation Analysis . . . 79
4.2.1. Lagrange Multiplier Test of Engle . . . 80
4.2.2. Determining ARMA Structure . . . 82
4.3. In–Sample Performance . . . 84
4.3.1. In–Sample Results . . . 84
4.3.2. Further Examination of Results . . . 86
4.3.3. In–Sample Performance Tests . . . 88
4.4. Out–of–Sample Performance . . . 92
4.4.1. Explanation of Procedures . . . 93
4.4.2. Out–of–Sample Results . . . 95
4.4.3. Out–of–Sample Performance Tests . . . 98
4.5. Short Summary . . . 101

**5. Summary and Conclusion** **103**

**A. Theoretical Basics and Derivations** **107**
A.1. Continuous Compounding . . . 107
A.2. Eigenvalues and Eigenvectors . . . 107
A.3. Derivation of Moments and Stationarity Conditions . . . 109
A.3.1. Normal Mixture GARCH(1,1) . . . 109
A.3.2. t-Mixture GARCH(1,1) . . . 110
A.3.3. Exponential Power Mixture GARCH(1,1) . . . 110
A.3.4. Skewed Exponential Power GARCH(1,1) . . . 111
A.3.5. Gauss–Laplace Sum GARCH(1,1) . . . 113
A.3.6. Skewed Gauss–Laplace Sum GARCH(1,1) . . . 113
A.3.7. Markov–Switching GARCH(1,1) . . . 115
A.4. Derivation of LM test . . . 116

**B. Figures and Tables for Descriptive Analysis** **121**
B.1. Term Structure of Interest Rates: 2D . . . 122
B.2. Term Structure of Interest Rates: 3D . . . 125
B.3. ADF Test Results . . . 128
B.4. Normality Tests . . . 129
B.4.1. Normality Tests in Levels . . . 129
B.4.2. Normality Tests in log-Differences . . . 131
B.5. Correlations . . . 133
B.6. Eigenvectors . . . 135

**C. Tables for Estimation Results** **137**
C.1. Evaluation of Spot Rates in Log-Differences . . . . . 138
C.2. Principal Components of Spot Rates in log-Differences . . . . . 141
C.3. ARCH Test . . . . . 144
C.4. In – Sample Results . . . . . 147
C.5. Tables for Further Examination of Results . . . . . 150
C.6. Results of In-Sample Performance Tests . . . . . 153
C.7. Forecasting Performance, h=4 . . . . . 159
C.8. Forecasting Performance, h=12 . . . . . 162
C.9. Results of Out-of-Sample Performance Tests . . . . . 165
C.10. Value at Risk, h=4 . . . . . 171
