Introduction 5
Outline 15

I A First Approach: The Global Minimization Problem under Additional Growth Conditions 19

1 A Γ-Convergence Result 21
1.1 Introduction and Results 21
1.2 The Model and Preliminaries 28
1.3 A General Representation Result 35
1.4 The Boundary Value Problem 47
1.5 Proof of the Main Results 52

II Existence and Convergence of Solutions to the Atomistic and Continuum Equations of Nonlinear Elasticity Theory 67

2 The Models 69
2.1 The Continuum Model 69
2.2 The Atomistic Model 70
2.3 The Cauchy-Born Rule 74

3 Stability 75
3.1 Stability Constants 75
3.2 Representation Formulae 80
3.3 Examples 87

4 The Static Case 97
4.1 The Continuum Problem 97
4.2 Solutions to the Atomistic Equations 100

4.3 Residual Estimates 103
4.4 Proof of the Main Result 110

5 The Dynamic Case **117**
5.1 Continuum Elastodynamics 117
5.2 Atomistic Elastodynamics 129

6 A Complimentary Result **149**

A Hyperbolic Regularity **157**

B Sobolev Functions **163**

C Elliptic Regularity **169**
