

# 1 Introduction to self-organizing control of networked systems

*This chapter gives an introduction to self-organizing control, its structure and its desired properties. It presents the main task, gives a literature survey on related results and summarizes the main contributions of the thesis.*

## Chapter contents

- 1.1 Self-organizing control of distributed networked systems . . . . . 4
- 1.2 Properties of self-organizing controlled systems . . . . . 5
- 1.3 Physically interconnected systems and multi-agent systems . . . . . 6
- 1.4 Literature survey on self-organizing aspects in networked control systems 7
- 1.5 Structure of the local control units . . . . . 15
- 1.6 Fundamental questions . . . . . 15
- 1.7 Main contributions of the thesis . . . . . 17
- 1.8 Structure of the thesis . . . . . 21
