List of Figures xv

List of Tables xix

List of Algorithms xxi

ACRONYMS AND NOTATION xxiii

1. Introduction 1
- 1.1. Motivation . . . 1
- 1.2. Outline of the Thesis . . . 4
- 1.3. Related own publications . . . 5
- 1.4. Used Software and Hardware . . . 5

2. Mathematical Basics 7
- 2.1. Linear Systems and Optimal Control . . . 7
  - 2.1.1. Basic Properties . . . 8
  - 2.1.2. Related Matrix Equations . . . 11
  - 2.1.3. Solution of the Algebraic Riccati Equation . . . 15
  - 2.1.4. Solution of the Algebraic Lyapunov Equation . . . 16
  - 2.1.5. Hamilton-Jacobi Theory . . . 24
- 2.2. Model Order Reduction of Linear Systems . . . 26
  - 2.2.1. Balanced Truncation . . . 27
  - 2.2.2. Interpolation-Based Model Order Reduction . . . 30

3. Optimal Control and Inverse Problems 33
- 3.1. Inverse Problems . . . 34
- 3.2. Finite-Time Tracking-Type Optimal Control . . . 36
  - 3.2.1. Model Problem and LQR Design . . . 36

3.2.2. Solution of the Inhomogeneous Tracking Problem 38
3.3. Numerical Experiments 44
3.3.1. A Diffusion Problem on the Unit Square 44
3.3.2. Real World Hollow Cylinder 49
3.4. Summary and Conclusion 52

4. Model Order Reduction of Linear Time-Varying Systems 53
4.1. Model Order Reduction using LTI Model Approximations 55
4.1.1. MOR for Switched Linear Systems 55
4.1.2. MOR for Parametric LTI Systems 60
4.2. Balanced Truncation for Linear Time-Varying Systems 63
4.3. Numerical Experiments 66
4.3.1. Moving Load Problem: Machine Stand-Slide Structure 66
4.3.2. BT for LTV Systems 77
4.3.3. Time-Varying Rail Example 84
4.4. Summary and Conclusion 89

5. Time Integration Methods for Differential Matrix Equations 91
5.1. Backward Differentiation Formulas 92
5.2. Rosenbrock Methods 94
5.3. Other Implicit Methods 97
5.3.1. Midpoint Rule 97
5.3.2. Trapezoidal Rule 98
5.4. Peer Methods 98
5.4.1. Implicit Peer Methods 99
5.4.2. Rosenbrock-Type Peer Methods 101

6. Efficient Solution of Large-Scale Differential Matrix Equations 107
6.1. Classical Low-Rank Factorization 109
6.1.1. Backward Differentiation Formulas 109
6.1.2. Rosenbrock Methods 111
6.1.3. Midpoint Rule 114
6.1.4. Trapezoidal Rule 115
6.1.5. Peer Methods 116
6.1.6. Limitation of the Classical Low-Rank Factorization 129
6.2. Symmetric Indefinite Low-Rank Factorization 131
6.2.1. Backward Differentiation Formulas 132
6.2.2. Rosenbrock Methods 133
6.2.3. Midpoint Rule 136
6.2.4. Trapezoidal Rule 137
6.2.5. Peer Methods 138
6.3. Column Compression 148
6.3.1. Classical Low-Rank Compression 149
6.3.2. Classical Low-Rank Compression for Complex Data 149

6.3.3. Symmetric Indefinite Compression 151
6.4. Numerical Experiments 152
6.4.1. Autonomous Control Systems 153
6.4.2. Non-Autonomous Control Systems 164
6.5. Summary and Conclusions 172

7. Conclusions and Outlook **175**
7.1. Summary and Conclusions 175
7.2. Future Research Perspectives 178

A. Fourth-Order Rosenbrock Method **183**

Theses **185**

Bibliography **187**
