

Contents

1	Introduction	1
2	Review on Shearlets for Image Analysis	7
2.1	Continuous Shearlet Systems	8
2.2	Discrete Shearlet Systems	10
2.3	Cone-adapted Shearlet Systems	12
2.4	Edge Detection using Shearlets	14
2.5	Digital Shearlets	18
2.5.1	Band-limited Shearlets	18
2.5.2	Compactly Supported Shearlets	19
2.6	Conclusion	20
3	Local Precision Shearlets	21
3.1	Mother Shearlet	21
3.2	Shearlet System and Transform	32
3.3	Frame Property	33
3.4	Signal Reconstruction	40
3.5	Practical Application	42
3.6	Conclusion	42
4	Edge Detection using Local Precision Shearlets	45
4.1	Characterization of Edge Points	46
4.2	Suitable Shearlets	60
4.3	Conclusion	62
5	Pedestrian Detection using Shearlet Features	65
5.1	Pedestrian Detection using Hand-crafted Features	65
5.2	Shearlet Image Features	67
5.3	Shearlet Filterbank	69
5.4	Implementation Details	71

5.5	Experiments	74
5.5.1	Detection Framework Settings	76
5.5.2	Image Feature Experiments	76
5.5.3	Filterbank Experiments	80
5.6	Conclusion	83
6	Deep Learning with Shearlets	85
6.1	Introduction on Neural Networks	85
6.1.1	Artificial Neural Networks	86
6.1.2	Convolutional Neural Networks	89
6.1.3	Pedestrian Detection Algorithms using CNNs	92
6.2	Integration of Shearlets in CNNs	98
6.2.1	Related Work	98
6.2.2	Shearlet Initialized CNNs	102
6.2.3	Implementation Details	103
6.3	Experiments	104
6.3.1	Pedestrian Classification	105
6.3.2	Pedestrian Detection	108
6.4	Conclusion	111
7	Embedded Realization	113
7.1	Hardware System	113
7.2	Software System	114
7.3	System Architecture	115
7.3.1	Interfaces	116
7.3.2	Dynamic Behavior	121
7.3.3	Partitioning	129
7.4	Implementation	129
7.4.1	Optimization	131
7.4.2	HW/SW Codesign	135
7.5	Conclusion	136
8	Conclusions and Perspectives	137
A	Spaces of Functions	141
B	Basic Fourier Analysis	143

C An Alternative Approach on Shearlet Design	145
D Notation, Symbols and Abbreviations	149
D.1 Standard Notation	149
D.2 Symbols	150
D.3 Abbreviations	152
Bibliography	155
Index	163
