<b>Zusammenfassung</b>	<b>iii</b>
<b>List of Symbols</b>	<b>xi</b>
<b>1 Introduction</b>	<b>1</b>
1.1 Publications . . . . .	3
1.2 Acknowledgement . . . . .	3
<b>2 A primer on matrix polynomials</b>	<b>5</b>
2.1 Matrices, matrix polynomials and polynomial matrices . . . . .	5
2.2 Eigenvalues and eigenvectors of matrix polynomials . . . . .	10
2.3 Linearizations of matrix polynomials . . . . .	14
2.4 Linearizations from vector spaces and Fiedler-pencils . . . . .	17
2.4.1 The classical ansatz spaces and their derivatives . . . . .	18
2.4.2 Fiedler-pencils and Fiedler-like linearization families . . . . .	19
2.4.3 From Fiedler-linearizations to block Kronecker matrix pencils	20
2.5 Outlook on Chapters 3 to 7 . . . . .	21
<b>3 Block Kronecker ansatz spaces</b>	<b>25</b>
3.1 Introduction of $\mathbb{G}_{\eta+1}(A)$ and basic properties . . . . .	26
3.2 Advanced structural analysis of $\mathbb{G}_{\eta+1}(A)$ . . . . .	33
3.3 The recovery of eigenvectors . . . . .	34
3.4 Block Kronecker pencils and Fiedler-like linearizations . . . . .	36
<b>4 Double block Kronecker ansatz spaces</b>	<b>39</b>
4.1 Definition of $\mathbb{D}\mathbb{G}_{\eta+1}(A)$ and basic properties . . . . .	39
4.1.1 Proof of Theorem 4.1 . . . . .	42
4.2 Advanced structural analysis of $\mathbb{D}\mathbb{G}_{\eta+1}(A)$ . . . . .	47
4.3 The superpartition principle . . . . .	49
4.3.1 Proof of Theorem 4.3 . . . . .	49
4.4 The inclusion relation . . . . .	51
4.5 The block-symmetric ansatz spaces $\mathbb{B}\mathbb{G}_{\eta+1}(A)$ . . . . .	52
4.6 A note on symmetric linearizations for symmetric matrix polynomials	56
4.7 Conclusions . . . . .	57

<b>5</b>	<b>Solving generalized eigenproblems</b>	<b>59</b>
5.1	Shift-and-invert reformulation . . . . .	60
5.1.1	Aspects on Krylov subspace methods . . . . .	61
5.2	Solving linear systems $\mathcal{L}(\tau)x = z$ . . . . .	62
5.3	Structured polynomial eigenproblems . . . . .	65
5.3.1	$T$ -even eigenproblems and the Even-IRA algorithm . . . . .	66
5.3.2	Numerical examples . . . . .	69
5.4	Algorithms for symmetric GEPs . . . . .	71
<b>6</b>	<b>The connection between <math>\mathbb{L}_1(A)</math>, <math>\mathbb{L}_2(A)</math> and <math>\mathbb{G}_{\eta+1}(A)</math></b>	<b>75</b>
6.1	Block Kronecker ansatz spaces and the spaces $\mathbb{L}_1(A)$ and $\mathbb{L}_2(A)$ . . . . .	75
6.2	The central relation between $\mathbb{L}_1(A)$ , $\mathbb{L}_2(A)$ and $\mathbb{G}_{\eta+1}(A)$ . . . . .	78
6.3	Conclusions . . . . .	80
<b>7</b>	<b>Generalized ansatz spaces for orthogonal bases</b>	<b>81</b>
7.1	The basic framework . . . . .	82
7.2	The recovery of eigen- and nullspaces . . . . .	88
7.2.1	The recovery of minimal indices and minimal bases . . . . .	90
7.3	A note on singular matrix polynomials . . . . .	91
7.4	Double generalized ansatz spaces . . . . .	96
7.4.1	Construction of block-symmetric pencils . . . . .	99
7.5	The eigenvector exclusion theorem . . . . .	102
7.5.1	The eigenvalue exclusion theorem . . . . .	104
7.6	Conclusions . . . . .	108
<b>8</b>	<b>Sesquilinear forms</b>	<b>109</b>
8.1	Introduction and basic definitions . . . . .	112
8.2	Special classes of $B$ -normal matrices . . . . .	116
8.3	Forms from generalized permutation matrices . . . . .	119
8.4	Outlook on Chapters 9 and 10 . . . . .	121
<b>9</b>	<b>Automorphic diagonalization of <math>B</math>-normal matrices</b>	<b>125</b>
9.1	Preliminary results on common eigenspaces . . . . .	126
9.2	An eigenbasis ordering . . . . .	129
9.3	Towards an automorphic diagonalization . . . . .	135
9.4	Frequently arising indefinite forms: examples . . . . .	140
9.4.1	The standard Euclidean scalar product . . . . .	141
9.4.2	The pseudoeuclidean inner product . . . . .	142
9.4.3	The perplectic and symplectic forms . . . . .	142
9.5	Unitary structure-preserving diagonalization . . . . .	144
9.6	Conclusions . . . . .	145

<b>10 Structured normal matrices</b>	<b>147</b>
10.1 Lagrangian subspaces . . . . .	148
10.2 Normal perhermitian matrices . . . . .	149
10.2.1 Normal perskew-Hermitian matrices . . . . .	157
10.3 Normal Hamiltonian matrices . . . . .	158
10.4 Conclusions . . . . .	161
<b>Bibliography</b>	<b>163</b>
<b>Index</b>	<b>173</b>
