

Inhaltsverzeichnis

1	Introduction.....	13
1.1	The project's origins and ideas.....	13
1.2	Experiments in science lessons in a German curriculum	15
1.3	Constructivism as the underlying idea of learning	16
2	IBSL: Self-regulated problem solving strategy usage in interactive learning environments	19
2.1	What is IBSL?	20
2.2	IBSL - A definition.....	21
2.3	Modelling IB(S)L: What happens?.....	22
2.3.1	Model of the Information Search Process (ISP).....	22
2.3.2	The Scientific Discovery as Dual Search Model.....	23
2.3.3	The NAW-approach	24
2.3.4	Summary: Models of IBSL	25
2.4	Summarising IBSL – so far	25
3	Strategy usage	27
3.1	What are <i>strategies</i> ?	27
3.2	IBSL-related strategies	28
3.2.1	Hypotheses: starting points for IBSL	29
3.2.2	Identification of information: Data collection.....	30
3.2.3	Theory and evidence at interplay: Think, do, evaluate?.....	31
3.2.4	Summary	33
3.3	Strategy acquisition	33
3.3.1	Acquiring a strategy	33
3.3.2	Teaching strategies	34
3.4	Influences on strategy usage.....	37
3.4.1	Production deficiency.....	37
3.4.2	Prior domain knowledge	38
3.4.3	Cognitive abilities.....	39
3.4.4	Influence of motivation	40
3.4.5	Scaffolding strategy usage – guiding inquiry.....	40
3.4.6	Summary	42
4	Virtual experimentation: Science in the 21 st century?	43
4.1	What is ‘real science’?.....	43
4.2	Instructional software	44
4.3	Causal Simulations: One example of instructional software.....	44
4.4	Reasonable integration of causal simulations in the classroom	45
4.5	Findings on virtual experiments (and a little beyond).....	46
4.5.1	Meaningful implementation?	46

4.5.2	Students' presuppositions and implications for simulations	46
4.5.3	Importance of design of the (TE)LE	47
4.5.4	Visualising non-macroscopic content	47
4.5.5	Supporting strategy usage	48
4.5.6	Comparing physical and virtual experiments: Does it make a difference?	49
4.5.7	Combining virtual and physical experiments	49
5	Aims of the study and implications for its design	51
6	Research questions and hypotheses	53
6.1	Focusing on knowledge and skills in test situations	53
6.2	Focusing on skills in action	56
6.3	Linking temporal data and test data	58
7	Study design	61
7.1	Intervention design	61
7.2	Measuring outcomes: Pre-post paper-pencil tests	62
7.2.1	“MStrat” – Identification and integration of knowledge	62
7.2.2	“BEIPS” - Steps of experimentation	63
7.2.3	“NAW” - Applying inquiry-based problem-solving in science	64
7.2.4	“LabSkills” - Lab materials handling: Skills and temporal knowledge	65
7.2.5	Topic Knowledge Tests “Buoyancy in liquids” and “Acids and bases”	67
7.2.6	“FAM” - Questionnaire on Current Motivation (QCM)	68
7.2.7	“KFT” – Cognitive Abilities	69
7.3	Measuring processes: Beyond paper-pencil	69
7.3.1	Some thoughts on “beyond quantitative data”: Reasons and criteria	69
7.3.2	Instruments of measurement for temporal data	70
7.3.3	Temporal data collection	71
7.4	Training	72
7.5	Experimentation environments	73
7.5.1	Development of experimentation environments: Overview	74
7.5.2	“Dr. Senkwürfel” - Buoyancy in liquids	74
7.5.3	“Dr. Blubber” - Acids and bases	79
7.5.4	Supporting strategy usage in the experimentation environments	82
7.6	Overall study design	85
8	Results of pre-post test data	87
8.1	Prelude: Processing data	87
8.2	Sample	87
8.3	Test characteristics	90
8.3.1	Reliability	90
8.3.2	Objectivity	91
8.3.3	Validity	91
8.3.4	Summary	93
8.4	Results: Is the intervention successful?	94

8.4.1	Pre-post-comparisons on paper-pencil tests	94
8.4.2	Effect of training	95
8.4.3	Results	96
8.5	RQ1: Which treatment leads to the best advancement of particular sub skills?. 96	
8.5.1	General remarks on statistical procedures in this chapter	96
8.5.2	Topic knowledge	97
8.5.3	Steps of experimentation	99
8.5.4	LabSkills.....	100
8.5.5	Motivation	101
8.5.6	Summary	102
8.6	RQ2: Which treatment leads to the best overall advancement of skills?	102
8.6.1	Results of effect sizes	103
8.6.2	Results of planned contrasts (chunking treatment groups)	103
8.6.3	Results of planned contrasts (one treatment against the rest)	104
8.6.4	Summary	105
8.7	Discussion.....	105
9	Results of temporal data	107
9.1	Data processing	107
9.1.1	Analytical approaches	107
9.1.2	Preparing for analyses: Event history generation.....	108
9.1.3	Re-quantification of qualitative data: Recoding.....	110
9.1.4	Filters used	111
9.2	Sample	111
9.3	General remarks on data	113
9.4	RQ3: Which patterns are characteristic for each mode of experiment respectively?	113
9.4.1	H3.1: Influence of mode of experimentation on number of actions	113
9.4.2	H3.2: Do students in virtual experiments touch more areas of content?..	129
9.4.3	H3.3: Using scaffolds	132
9.5	RQ4: How do the scaffolds provided affect students' behaviour?	143
9.5.1	H4a: The influence of prompts.....	143
9.5.2	H4b: The influence of visualisations.....	145
9.6	RQ5: How does the mode of the first experiment influence strategy usage in the second experiment?	147
9.7	Knowing is not doing: Possible reasons for production deficiencies.....	149
9.8	Is it a matter of reasoning?	150
10	Linking temporal data and test data	153
10.1	General remarks on sample and data.....	153
10.2	RQ6: How do factors such as cognitive abilities and prior domain knowledge interact with strategy usage?	154
10.2.1	Prior domain knowledge: <i>Acids and bases</i>	155
10.2.2	Prior domain knowledge: Buoyancy in liquids	156
10.2.3	Prior knowledge on IBSL strategies.....	157

10.2.4	Cognitive Abilities	159
10.2.5	Motivation	159
10.2.6	Summary	160
10.3	RQ7: How does good or bad strategy usage during experimentation relate to learning outcome concerning strategy knowledge and content knowledge? ...	160
10.3.1	Correlations with content knowledge “Acids and bases”	161
10.3.2	Correlations with content knowledge “Buoyancy in liquids”	162
10.3.3	Correlations with “Steps of Experimentation”	163
10.3.4	Summary and conclusion	164
11	Summary.....	165
11.1	Test instruments.....	165
11.2	Comparing treatments	165
11.3	Strategy usage.....	165
11.4	Methods	165
12	Implications and desiderata	167
13	Bibliography	169
14	Personal.....	187
14.1	Erklärung	187
14.2	Curriculum vitae	187
14.3	List of Publications.....	188
14.3.1	Articles in Conference Proceedings	188
14.3.2	Oral Presentations.....	188
14.3.3	Poster Presentations.....	188
