<b>Preface</b>	<b>I</b>
<b>List of Figures</b>	<b>VII</b>
<b>List of Tables</b>	<b>IX</b>
<b>List of Abbreviations and Symbols</b>	<b>XII</b>
<b>1 Introduction</b>	<b>1</b>
1.1 Motivation . . . . .	1
1.2 Domain-specific positioning . . . . .	6
1.3 Problem statement . . . . .	7
1.4 Scientific positioning . . . . .	8
1.5 Scientific inquiry . . . . .	10
1.6 Structure of the thesis . . . . .	13
<b>2 Value from individualization of services</b>	<b>15</b>
2.1 Value-oriented view on services . . . . .	15
2.1.1 Origins of service research . . . . .	15
2.1.2 Production-oriented view on services . . . . .	17
2.1.3 Consumer-oriented view on services . . . . .	22
2.1.4 Summary . . . . .	42
2.2 Individualization of services . . . . .	45
2.2.1 Individual information systems . . . . .	45
2.2.2 Mass customization . . . . .	57
2.2.3 Personalization . . . . .	72
2.2.4 Technological aspects of individualization . . . . .	80
<b>3 Requirements analysis</b>	<b>87</b>
3.1 Consumer-oriented information-intensive services . . . . .	87
3.1.1 Characteristics . . . . .	87
3.1.2 Mobile services . . . . .	91
3.1.3 Everyday computing applications . . . . .	95
3.2 Requirements for value co-creation via individualization . . . . .	98
3.2.1 Building blocks of interaction . . . . .	98
3.2.2 Analysis of value co-creation . . . . .	100
3.2.3 Individualization of mobile services . . . . .	102
3.3 Requirements for everyday computing applications . . . . .	105
3.3.1 Ambient awareness . . . . .	106
3.3.2 Analysis of everyday computing applications . . . . .	107
3.3.3 Semantic knowledge representation . . . . .	108

## Contents

---

3.4	Requirement integration . . . . .	114
3.4.1	Integration of value- and application-oriented requirements .	114
3.4.2	Requirement integration with technological aspects of individualization . . . . .	117
<b>4</b>	<b>Conceptual framework for individualization of information-intensive services</b>	<b>121</b>
4.1	Layered-modular architecture . . . . .	121
4.1.1	Modular architecture . . . . .	121
4.1.2	Layered architecture . . . . .	124
4.1.3	Client and server side layer . . . . .	126
4.2	Personalization mechanisms . . . . .	131
4.2.1	Traditional recommendation mechanisms . . . . .	132
4.2.2	Context-aware recommendation mechanisms . . . . .	139
4.2.3	Incorporation of semantic web technologies . . . . .	146
4.2.4	Incorporation of learning mechanisms and large scale recommender systems . . . . .	149
<b>5</b>	<b>Application for disease prevention and well-being services</b>	<b>155</b>
5.1	Architectural framework . . . . .	155
5.1.1	Use case . . . . .	155
5.1.2	Client side layer . . . . .	156
5.1.3	Server side layer . . . . .	159
5.2	Personalization mechanisms for mobile services . . . . .	161
5.2.1	Semantic representation of query and search index . . . . .	162
5.2.2	Filtering mechanisms . . . . .	169
5.2.3	Ranking mechanisms . . . . .	171
5.2.4	Learning mechanisms . . . . .	176
5.3	Personalization mechanisms for running routes . . . . .	181
5.3.1	Route model . . . . .	182
5.3.2	Filtering mechanisms . . . . .	184
5.3.3	Ranking mechanisms . . . . .	186
5.3.4	Learning mechanisms . . . . .	188
5.4	Personalization mechanisms for motorized bicycles . . . . .	189
5.4.1	Safe cycling outdoor training . . . . .	189
5.4.2	Sensing cycling training performance and user load . . . . .	191
5.4.3	Personalization mechanisms for power and training plan adaptation . . . . .	193
<b>6</b>	<b>Implementation</b>	<b>195</b>
6.1	MENTORbike system . . . . .	196
6.1.1	Component diagram . . . . .	196
6.1.2	System specification . . . . .	198
6.2	Recommendation process . . . . .	200
6.2.1	Flow diagram . . . . .	200
6.2.2	Class diagrams . . . . .	200
6.2.3	Interface design . . . . .	206
6.2.4	Proactive recommendations . . . . .	207

6.3	GUI for mobile service recommendation . . . . .	210
6.3.1	Simple and advanced user interface . . . . .	211
6.3.2	Simple data editing and user feedback . . . . .	213
6.3.3	Data visualization via ontology browsing . . . . .	214
6.4	GUI for motorized bicycles . . . . .	218
<b>7</b>	<b>Evaluation</b>	<b>223</b>
7.1	Evaluation of mobile service recommendation . . . . .	223
7.2	Relevance of a mobile running assistant . . . . .	242
7.3	Evaluation of safe cycling outdoor training . . . . .	244
<b>8</b>	<b>Conclusions</b>	<b>249</b>
8.1	Summary of results . . . . .	249
8.2	Limitations and future work . . . . .	252
	<b>References</b>	<b>255</b>
