|-----------------------------------------------------------------------------------------------------------------------------------------------------|---------------|
| <b>Introduction.....</b>                                                                                                                            | <b>1</b>      |
| <b>Chapter 1: Global climate change situation.....</b>                                                                                              | <b>7</b>      |
| 1.1 Overview of the factors leading to global climate change .....                                                                                  | 7             |
| 1.1.1 Natural causes .....                                                                                                                          | 9             |
| 1.1.2 Anthropogenic causes.....                                                                                                                     | 18            |
| 1.1.3 The science of climate change: What it is scientific<br>evidence.....                                                                         | 25            |
| 1.1.4 The political background to global climate change:<br>6 years before the Paris Agreement .....                                                | 29            |
| <br><b>Chapter 2: Global climate change decision-making<br/>        center .....</b>                                                                | <br><b>47</b> |
| 2.1 Global climate change centre for decision making PA .....                                                                                       | 47            |
| 2.2 Understanding decision-making in international relations .....                                                                                  | 48            |
| 2.3 Prologue on the nature of the global climate change centre:<br>From Kyoto to Copenhagen .....                                                   | 50            |
| 2.4 Prologue on the nature of the global climate change centre:<br>Linking NDC, mitigation and adaptation.....                                      | 53            |
| 2.5 A multi-criteria assessment framework for the<br>decision-making hub: Putting actors and organizations<br>at the heart of decision-making ..... | 57            |
| 2.5.1 Actors at the centre of global climate change<br>decision-making: Insights from regime theory .....                                           | 57            |
| 2.5.2 The anatomy of institution: The influence of<br>organizations at the decision-making centre .....                                             | 66            |
| 2.5.3 The decision-making centre of the climate change<br>instrument: Transboundary organizations.....                                              | 95            |

**Chapter 3: Global decision-making process on  
climate change: Paris Agreement.....99**

|                                                                                              |     |
|----------------------------------------------------------------------------------------------|-----|
| 3.1 A framework for diagnosing the structure of the global<br>decision-making process.....   | 100 |
| 3.1.1 Two-stage structure for the global decision-making<br>process: Application to PA ..... | 102 |
| 3.1.1.1 The rationale for the political stages of the<br>decision-making process .....       | 102 |
| 3.1.1.2 Rationale for the economic phases of the<br>decision-making process.....             | 129 |
| 3.2 Summary in plain language .....                                                          | 150 |

**Chapter 4: Global decision on climate change:  
The Paris Agreement .....153**

|                                                                                                                                   |     |
|-----------------------------------------------------------------------------------------------------------------------------------|-----|
| 4.1 The Paris Agreement on climate change: Critical choice,<br>nature, and structure of analysing an international decision ..... | 154 |
| 4.2 Advancing decision-making on climate change under<br>the Paris Agreement: A guide to principles, rules .....                  | 154 |
| 4.3 Summary in plain language .....                                                                                               | 196 |

**Chapter 5: Implementation of mega-conferences  
such as Paris .....201**

|                                                                                                                                                  |     |
|--------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| 5.1 The importance of implementation politics for<br>decision-making on global climate change.....                                               | 201 |
| 5.2 The lessons of global decision-making on climate change:<br>From Marrakech to Glasgow.....                                                   | 202 |
| 5.3 Implementation of the Paris Agreement:<br>Guidance for the implementation of global<br>decision-making on climate change.....                | 208 |
| 5.4 Summary and conclusion in plain language:<br>Is the decision-making architecture of the Paris<br>Agreement a mirage, a dummy or reality..... | 242 |

|                    |     |
