

Table of Contents

Preface.....	I
Acknowledgement	III
Table of Contents	V
List of Figures.....	IX
List of Tables.....	XI
List of Abbreviations.....	XIV
1 Introduction	1
1.1 Motivation and Problem Statement	1
1.2 Research Objective.....	4
1.3 Research Design	10
1.3.1 Research Paradigm	10
1.3.2 Research Methods	14
1.4 Thesis Structure.....	21
2 State of the Art	23
2.1 Supply Chain Management	23
2.1.1 Terminology and Definition of Supply Chain Management	23
2.1.2 Supply Chain Planning	25
2.2 Sales and Operations Planning.....	28
2.2.1 Terminology and Definition	28
2.2.2 Constitutive Elements	30
2.2.3 Supportive Elements	38
2.2.3.1 Performance Management	38
2.2.3.2 Information Technology	40
2.2.4 Implementation	43
2.3 Data-Driven Decision Support.....	48
2.3.1 Terminology and Definition of Data and Data-Driven Decision-Making	48
2.3.2 Business Analytics	51
2.3.3 Decision Support Systems	53

2.4	Current Research Gaps.....	56
3	Development of a Taxonomy of S&OP Resources and Capabilities.....	59
3.1	Research Objectives.....	59
3.2	Theoretical Background	60
3.2.1	Resource-Based View and Dynamic Capability View.....	60
3.2.2	Ambidexterity	62
3.3	Research Approach	64
3.4	S&OP taxonomy	67
3.4.1	Environment of the Taxonomy	67
3.4.2	Data Collection.....	68
3.4.3	Structure of the Taxonomy	70
3.4.4	Characteristics of the Taxonomy	73
3.5	Taxonomy Classes of S&OP Designs	92
3.5.1	Structure of the Taxonomy Classes	92
3.5.2	Taxonomy Classes	94
3.5.3	Validation of the Taxonomy Classes	99
3.6	Discussion and Theoretical Implications.....	100
3.7	Conclusion and Limitations	103
4	Identification of S&OP Objectives, Tasks, and Business Analytics Applications	107
4.1	Development of an S&OP Performance Framework	107
4.1.1	Research Objectives.....	108
4.1.2	Research Approach	108
4.1.3	S&OP Performance Framework.....	111
4.1.4	Discussion and Theoretical Implications.....	119
4.1.5	Conclusion and Limitations	121
4.2	Identification of SCP Tasks and Business Analytics Applications	122
4.2.1	Research Objectives.....	123
4.2.2	Research Approach	124
4.2.3	Tactical Supply Chain Planning Tasks in S&OP.....	128
4.2.4	Decision Support in S&OP.....	137
4.2.5	Discussion and Theoretical Implications.....	145
4.2.6	Conclusion and Limitations	147

5	Development of a Data-Driven S&OP Design Method	151
5.1	Research Objectives	151
5.2	Research Approach	152
5.3	Identification of Data-Driven S&OP Requirements	153
5.3.1	Case Study Description	154
5.3.2	Case Study Findings.....	158
5.3.3	Requirements Analysis.....	162
5.3.4	Requirements Evaluation.....	166
5.4	Data-Driven S&OP Design Method	168
5.4.1	Configurable Enterprise Architecture	169
5.4.2	Design Process	174
5.5	Discussion and Theoretical Implications.....	186
5.6	Conclusion and Limitations	188
6	Evaluation	191
6.1	Practical Evaluation	191
6.1.1	Methodological Approach	191
6.1.2	Case A: German Metal Wholesaler	193
6.1.3	Case B: North American Metal Wholesaler	195
6.1.4	Case C: German Sanitary Fittings Manufacturer	198
6.1.5	Discussion.....	202
6.2	Analytical Evaluation	203
6.2.1	Reliability Assessment.....	205
6.2.2	Validity Assessment	205
6.2.3	Summary	209
7	Conclusion	211
7.1	Reflections on the Accomplishment of the Research Objective	211
7.2	Contributions to Research and Practice	213
7.2.1	Theoretical Implications.....	213
7.2.2	Practical Implications	214

7.3 Limitations and Outlook.....	215
References.....	219
Appendix.....	260
A Appendix –Research Design.....	261
B Appendix - State of the Art	265
C Appendix – Development of a Taxonomy of S&OP Resources and Capabilities	271
D Appendix – Identification of S&OP Objectives, Tasks, and Business Analytics Applications.....	279
E Appendix – Development of a Data-Driven S&OP Design Method	303
F Appendix F - Evaluation.....	339
