

Contents

1	Introduction	1
1.1	Motivation and Goals	2
1.2	Scientific Approach	4
1.3	Thesis Outline	9
1.4	Contributions	11
2	Application Scenario	15
2.1	Introduction to Industrial Bonding	15
2.2	Observing an Industrial Use Case	17
2.3	Interviews with Experts	20
2.4	Derivation of Requirements	22
2.5	Research Questions	23
3	Background	27
3.1	Human (Perception) Capabilities	28
3.2	Augmented Reality	39
3.3	Working Environments	44
3.4	Summary	51
4	Conceptual Design Decisions	55
4.1	Representation of Time	55
4.2	Visual AR Guidance	59
4.3	Summary	64
5	Design of In-View Task Support	67
5.1	In-View AR Instructions for Manual Tasks	68
5.2	AR Modalities for Time-Critical Tasks	70
5.3	Parallel Visualizations of Time-Critical Tasks	85
5.4	Summary	101
6	Design of Out-of-View Task Support	107
6.1	Guidance Techniques for Multiple Distributed Tasks	107
6.2	Comparing Different Guidance Techniques	109
6.3	Guidance Techniques in a Contextual Use Case	120
6.4	Summary	134
7	Design of Task Overviews	137
7.1	Opportunities to Support Take-Over Situations	138
7.2	Conceptual Design of Overview Techniques	140
7.3	Comparing Different Overview Techniques	144

7.4 Summary	157
8 Conclusion	159
8.1 Recapitulation	159
8.2 Contributions to the Research Questions	160
8.3 Future Work	163
8.4 Concluding Remarks	164
Figures	164
Tables	171
