

CONTENTS

I	PREAMBLE	1
1	INTRODUCTION	3
2	PRELIMINARIES	11
2.1	Sets and Words	11
2.2	Complexity Theory	14
2.3	(Linear) Context-free Grammars and Languages	16
2.4	Regular Languages and DFAs	17
2.5	Pumping Lemmata for Regular Languages	20
2.6	Characterizations	25
II	DESCRIPTIONAL COMPLEXITY	29
3	ON THE COMPARISON OF PUMPING CONSTANTS	31
3.1	(Linear) Context-free Pumping	31
3.2	Comparing mps to other Minimal Pumping Constants	37
3.3	Jaffe's Pumping Lemma, Revisited	43
4	DESCRIPTIONAL COMPLEXITY OF THE OPERATION PROBLEM	57
4.1	Unary Languages	57
4.2	Non-Unary Languages	81
4.2.1	Operational Complexity of Sub-Word Pumping	81
4.2.2	Operational Complexity of (Linear) Context-free Pumping	93
III	COMPUTATIONAL COMPLEXITY	101
5	IS EVERYTHING DECIDABLE?	103
5.1	Context-free Pumping for Regular Languages	103
5.2	Context-free Pumping for Context-free Languages	106
5.3	Determining the Degree of Unsolvability	109
6	NARROWING THE DECIDABILITY GAP	113
6.1	Pumping k-rated Linear Languages	113
6.1.1	Facts about k-rated Linear Languages	114
6.1.2	Decidability of the PUMPING-PROBLEM for k-rated Linear Languages	120
6.2	Pumping Well-matched Visibly Pushdown Languages	125
7	HARDNESS AND INAPPROXIMABILITY	135
7.1	Pumping Preserving Homomorphisms	136
7.2	Minimal Pumping Constants and Longest Paths	144
7.3	The PUMPING-PROBLEM for Non-Unary DFAs	147
7.4	The PUMPING-PROBLEM for Non-Unary NFAs	152
7.5	The PUMPING-PROBLEM for Unary DFAs	155

7.6	The PUMPING-PROBLEM for Unary NFAs	159
8	THE PUMPING-PROBLEM FOR SUBREGULAR LANGUAGES	165
8.1	The PUMPING-PROBLEM for DFAs, Revisited	165
8.2	Applications of the Framework	169
IV	OUTRO	175
9	SUMMARY AND FURTHER RESEARCH DIRECTIONS	177
