<b>Abstract</b>	<b>vii</b>
<b>Notation</b>	<b>xiii</b>
<b>1. Introduction</b>	<b>1</b>
1.1. Motivation . . . . .	1
1.2. Literature overview . . . . .	3
1.2.1. Nonlinear detectability . . . . .	3
1.2.2. Robust stability of MHE . . . . .	4
1.2.3. MHE for real-time applications . . . . .	5
1.2.4. Joint state and parameter estimation . . . . .	6
1.2.5. Performance guarantees for state estimation . . . . .	8
1.3. Contributions and outline of this thesis . . . . .	9
<b>2. Nonlinear detectability</b>	<b>17</b>
2.1. On different variants of i-IOSS . . . . .	17
2.2. Incremental integral input/output-to-state stability . . . . .	19
2.2.1. Setup and Preliminaries . . . . .	19
2.2.2. i-iOSS for systems with disturbed outputs . . . . .	22
2.2.3. Lyapunov characterizations of i-iOSS . . . . .	26
2.2.4. Robust observers and i-iOSS . . . . .	36
2.3. Summary . . . . .	39
<b>3. Robust stability</b>	<b>41</b>
3.1. Basics of MHE . . . . .	41
3.2. Continuous-time Lyapunov-based MHE . . . . .	45
3.2.1. Setup . . . . .	45
3.2.2. Design of the MHE scheme . . . . .	46
3.2.3. Robust stability analysis . . . . .	50
3.3. Discussion . . . . .	56
3.4. Numerical examples . . . . .	61
3.4.1. Chemical reaction . . . . .	61
3.4.2. Quadrotor . . . . .	64
3.5. Summary . . . . .	68
<b>4. Suboptimality guarantees for real-time applications</b>	<b>69</b>
4.1. System description and auxiliary observer . . . . .	69
4.2. Optimizing system trajectories . . . . .	72
4.2.1. Suboptimal MHE design . . . . .	73

4.2.2. Systems subject to nonlinear process disturbances . . . . .	77
4.2.3. Systems subject to additive process disturbances . . . . .	83
4.2.4. Discussion . . . . .	88
4.2.5. Auxiliary observers leaving the domain of the system . . . . .	89
4.2.6. Numerical example . . . . .	95
4.3. Optimizing observer trajectories . . . . .	102
4.3.1. Suboptimal MHE design . . . . .	102
4.3.2. Stability analysis . . . . .	105
4.3.3. Numerical example . . . . .	110
4.4. Summary . . . . .	114
<b>5. Joint state and parameter estimation</b>	<b>117</b>
5.1. Setup . . . . .	117
5.2. Constant parameters . . . . .	120
5.2.1. Design . . . . .	120
5.2.2. Stability analysis . . . . .	123
5.2.3. Special case: uniform persistent excitation . . . . .	132
5.2.4. Numerical example . . . . .	135
5.3. Time-varying parameters . . . . .	139
5.3.1. Design . . . . .	141
5.3.2. Stability analysis . . . . .	143
5.3.3. Numerical example . . . . .	151
5.4. Summary . . . . .	153
<b>6. Turnpike analysis and performance guarantees</b>	<b>155</b>
6.1. Setup . . . . .	155
6.2. Turnpike in optimal state estimation problems . . . . .	159
6.2.1. Motivating example . . . . .	160
6.2.2. Turnpike under strict dissipativity . . . . .	161
6.2.3. Turnpike under decaying sensitivity . . . . .	163
6.2.4. Linear systems . . . . .	165
6.2.5. Discussion . . . . .	171
6.3. Performance analysis . . . . .	173
6.3.1. A delay improves the estimation results . . . . .	174
6.3.2. Performance estimates for MHE . . . . .	176
6.3.3. MHE with prior weighting . . . . .	181
6.3.4. Offline state estimation . . . . .	185
6.3.5. Good performance implies accurate state estimates . . . . .	187
6.4. Numerical examples . . . . .	189
6.4.1. Offline estimation . . . . .	190
6.4.2. Online estimation . . . . .	193
6.5. Summary . . . . .	199
<b>7. Verification methods</b>	<b>203</b>
7.1. Nonlinear detectability . . . . .	203
7.1.1. i-IOSS Lyapunov functions for discrete-time systems . . . . .	204

7.1.2. i-IoSS Lyapunov functions for continuous-time systems . . . . .	213
7.2. Persistence of excitation . . . . .	217
7.2.1. Constant parameters . . . . .	217
7.2.2. Time-varying parameters . . . . .	225
7.3. Summary . . . . .	231
<b>8. Conclusions</b>	<b>233</b>
8.1. Summary . . . . .	233
8.2. Outlook . . . . .	236
<b>Bibliography</b>	<b>241</b>
<b>A. Publications of the author and CRediT author statement</b>	<b>263</b>
