<b>Abstract</b>	xiii
<b>Deutsche Kurzfassung</b>	xv
<b>1 Introduction</b>	1
1.1 Motivation . . . . .	1
1.2 Related work . . . . .	3
1.3 Contributions and outline of the thesis . . . . .	8
<b>2 Background</b>	13
2.1 Neural networks . . . . .	13
2.2 Quadratic constraints . . . . .	22
2.3 Robust neural networks . . . . .	25
<b>3 Robustness analysis of neural networks</b>	31
3.1 Quadratic constraints for GroupSort activation functions . . . . .	31
3.2 State space representations for convolutional layers . . . . .	36
3.3 SDP-based Lipschitz constant estimation . . . . .	40
3.4 Sources of conservatism . . . . .	52
3.5 Numerical examples . . . . .	56
3.6 Summary . . . . .	64
<b>4 Synthesis of robust neural networks</b>	67
4.1 Training Lipschitz-bounded neural networks using constrained optimization . . . . .	67
4.2 Training Lipschitz-bounded neural networks using unconstrained optimization . . . . .	74
4.3 Numerical examples . . . . .	89
4.4 Summary . . . . .	102
<b>5 Stability analysis of closed-loop systems with neural components</b>	105
5.1 Reduced conservatism using Zames-Falb multipliers . . . . .	105
5.2 Offset-free setpoint tracking . . . . .	116
5.3 Numerical examples . . . . .	123
5.4 Summary . . . . .	126
<b>6 Conclusions</b>	129
6.1 Summary . . . . .	129
6.2 Discussion . . . . .	131
